EDUCATION

B.E. Electronics & Computer Engg.	*MBM University, Jodhpur*	2026	**7.3 CGPA**
RBSE (XII)	*Matrix High School, Sikar*	2021	**94%**

TECHNICAL SKILLS

Languages:	C, C++, SQL
Frontend:	HTML, CSS, JavaScript, React.js, Tailwind CSS
Backend:	Node.js, Express.js, REST APIs, JWT Authentication
Databases:	MongoDB, MySQL
ServiceNow:	User Administration, Catalog Items, Flow Designer, ACLs, Dashboards
Tools:	Git/GitHub, VS Code, Postman, PRTG Network Monitor

PROFESSIONAL EXPERIENCE

Associate ServiceNow Administrator | *Cyntexa Labs Pvt. Ltd* Mar 2026 – Apr 2026

- Administered users, groups, roles, and permissions on an enterprise ServiceNow instance.
- Configured Catalog Items and Record Producers to streamline service request intake.
- Automated approvals and notifications with Flow Designer, reducing manual intervention.
- Enforced role-based access control through ACLs; built Reports and Dashboards for monitoring.

Software Development Intern | *North Western Railway* Jun 2025 – Jul 2025

- Built a full-stack Bandwidth Monitoring & Analysis Dashboard using Python, HTML, CSS, and JavaScript.
- Utilized PRTG Network Monitor for real-time network data collection and bandwidth trend analysis.
- Implemented a threshold-based alert system to detect high-usage events and track network downtime.
- Improved network uptime reliability by 15% through proactive monitoring and automated notifications.

Research Intern | *Genus Power Infrastructures Ltd* Jun 2024 – Jul 2024

- Researched smart energy metering technologies in the R&D division of a leading power infrastructure firm.
- Analyzed design and architecture of smart meters and their role in modern power distribution systems.
- Investigated communication protocols including RF, GSM, GPRS, and DLMS/COSEM used in smart metering.
- Conducted testing, calibration, and reliability assessment of smart meters in lab environments.

PROJECTS

Every Day Better – Gamified English Learning SaaS | *React.js | Node.js | MongoDB | Web Speech API* Live | GitHub

- Architected a 60-day gamified English learning platform inspired by Duolingo, featuring daily task systems, dynamic streak tracking, and XP-based leveling.
- Integrated browser-native Web Speech API for Text-to-Speech pronunciation and MediaRecorder API for real-time voice recording and speaking timers.
- Designed secure backend architecture with JWT authentication, role-based admin panels, and dynamic progress analytics visualized using Recharts.

FocusDesk – Library Discovery & Seat Booking Platform | *React.js | Node.js | MongoDB | Mongoose* Live | GitHub

- Developed a full-stack discovery platform enabling students to find self-study libraries, filter by amenities (AC, parking, seating), and check real-time seat availability.
- Built role-specific workflows and dashboards for students to manage bookings and for library owners to update seat status and pricing.
- Implemented robust RESTful APIs with secure authentication and database indexing for fast location-based search queries.

SmartBook Sharing – Academic Marketplace | *React.js | Node.js | Express.js | MongoDB | Razorpay* Live | GitHub

- Developed a full-stack marketplace for second-hand books with secure authentication and role-based access control.
- Implemented order lifecycle management, delivery tracking, tracking IDs, and escrow-based payments using Razorpay.
- Built REST APIs with JWT authentication and developed responsive React interfaces for order tracking and management.
- Deployed the application on Render with dynamic CORS configuration and environment variable management.

ACTIVITIES & LEADERSHIP

- Led and organized mentorship sessions as a member of Aarogyam Club, MBM University.
- Participated in on-ground social service activities under NSS — campus cleanliness and environmental awareness.
